Optimal Production and Maintenance Policy for Imperfect Production Systems
Chih-Hsiung Wang 151
Published online 27 December 2005

Algorithms for the Multi-item Multi-vehicles Dynamic Lot Sizing Problem
Shoshana Anily and Michal Tzur 157
Published online 28 December 2005

A New Reformulation Approach for the Generalized Partial Covering Problem
Youngho Lee, Hanif D. Sherali, Ikhyun Kwon, and Seongin Kim 170
Published online 28 December 2005

Issue 3, April 2006

Editorial
Barry L. Nelson 181
Published online 6 February 2006

A Multilevel Passenger Screening Problem for Aviation Security
Laura A. McLay, Sheldon H. Jacobson, and John E. Kobza 183
Published online 6 February 2006

The Banzhaf Value and Communication Situations
J.M. Alonso-Meijide and M.G. Fiestras-Janeiro 198
Published online 6 February 2006

Minimizing the Makespan in Open-Shop Scheduling Problems with a Convex Resource Consumption Function
Dvir Shabtay and Moshe Kaspi 204
Published online 2 February 2006

Modeling the Operation of Multireservoir Systems Using Decomposition and Stochastic Dynamic Programming
T.W. Archibald, K.I.M. McKinnon, and L.C. Thomas 217
Published online 6 February 2006

A Stochastic Model for Burn-In Procedures in Accelerated Environment
Ji Hwan Cha 226
Published online 6 February 2006

Issue 4, June 2006

Relaxed Sequencing Games Have a Nonempty Core
Marco Slikker 235
Published online 21 February 2006

Approximation Algorithms for Minimizing Total Weighted Completion Time of Orders on Identical Machines in Parallel
Joseph Y-T. Leung, Haibing Li, and Michael Pinedo 243
Published online 21 February 2006

A Mathematical Programming Approach for Improving the Robustness of Least Sum of Absolute Deviations Regression
Avi Giloni, Bhaskar Sengupta, and Jeffrey S. Simonoff 261
Published online 27 February 2006

Maximizing Project Cash Availability
Joseph G. Szmerekovsky and George L. Vairaktarakis 272
Published online 7 March 2006

Using Real Options Analysis to Value Reoptimization Options in the Shifting Bottleneck Heuristic
Thomas G. Yeung and Scott J. Mason 285
Published online 8 March 2006

Bin-Packing Problem with Concave Costs of Bin Utilization
Chung-Lun Li and Zhi-Long Chen 298
Published online 9 March 2006

Maximizing the Ratio of Two Convex Functions over a Convex Set
Harold P. Benson 309
Published online 9 March 2006

Transient Analysis of Markov Models of Fault-Tolerant Systems with Deferred Repair Using Split Regenerative Randomization
Jamal Temsamani and Juan A. Carrasco 318
Published online 9 March 2006

A Sequential Bayesian Generalization of the Jelinski–Moranda Software Reliability Model
Alan Washburn 354
Published online 9 March 2006

Issue 5, August 2006

Priority and Dynamic Scheduling in a Make-to-Stock Queue with Hyperexponential Demand
Apurva Jain 363
Published online 15 March 2006

Data-Driven Variation Source Identification for Manufacturing Process Using the Eigenspace Comparison Method
Nong Jin and Shiyu Zhou 383
Published online 22 March 2006

Contractual Agreements for Coordination and Vendor-Managed Delivery under Explicit Transportation Considerations
Ayşegül Toptal and Sila Çetinkaya 397
Published online 22 March 2006

Requirements Planning for Modular Products
Anand Paul and Asoo J. Vakharia 418
Published online 27 March 2006

A Misclassification Cost-Minimizing Evolutionary–Neural Classification Approach
Parag Pendharkar and Sudhir Nanda 432
Published online 29 March 2006

Resale Price Maintenance Contracts with Retailer Sales Effort: Effect of Flexibility and Competition
Haresh Gurnani and Yi Xu 448
Published online 31 March 2006

Fully Sequential Indifference-Zone Selection Procedures with Variance-Dependent Sampling
L. Jeff Hong 464
Published online 5 April 2006

On-Line Parameter Estimation for a Partially Observable System Subject to Random Failure
Daming Lin and Viliam Makis 477
Published online 5 April 2006

Issue 6, September 2006

Vertically Restrictive Pricing in Supply Chains with Price-Dependent Demand
Yong Liu, Michael J. Fry, and Amitabh S. Raturi 485
Published online 10 April 2006

An Absolute Approximation Algorithm for Scheduling Unrelated Machines
Evgeny Shchepin and Nodari Vakhania 502
Published online 10 April 2006

Replicated Batch Means for Steady-State Simulations
Nilay Tanık Argon and Sigrún Andradóttir 508
Published online 10 April 2006

The Stochastic Joint Replenishment Problem: A New Policy, Analysis, and Insights
Banu Yüksel Özkaya, Ülkü Gürler, and Emre Berk 525
Published online 25 April 2006

Emergency Transshipment in Decentralized Dealer Networks: When to Send and Accept Transshipment Requests
Hui Zhao, Vinayak Deshpande, and Jennifer K. Ryan 547
Published online 3 May 2006

A Heuristic for Maximizing the Number of On-Time Jobs on Two Uniform Parallel Machines
Christos Koulamas and George J. Kyparisis 568
Published online 3 May 2006

Reliability Inference for Field Conditions from Accelerated Degradation Testing
Haitao Liao and Elsayed A. Elsayed 576
Published online 18 May 2006

Modeling and Analysis of Uncertain Time-Critical Tasking Problems
Donald P. Gaver, Patricia A. Jacobs, Gennady Samorodnitsky, and Kevin D. Glazebrook 588
Published online 22 May 2006

Issue 7, October 2006

Special Issue on Applications of Financial Engineering in Operations, Production, Services, Logistics, and Management

Introduction to the Special Issue on Applications of Financial Engineering in Operations, Production, Services, Logistics, and Management
John Birge and Vadim Linetsky 601
Published online 1 August 2006

Mean-Variance Trade-offs in Supply Contracts
Victor Martínez-de-Albéniz and David Simchi-Levi 603
Published online 28 July 2006

The α-Reliable Mean-Excess Regret Model for Stochastic Facility Location Modeling
Gang Chen, Mark S. Daskin, Zuo-Jun Max Shen, and Stanislav Uryasev 617
Published online 28 July 2006

Market Risk and Process Uncertainty in Production Operations
Bardia Kamrad and Keith Ord 627
Published online 1 August 2006

Equity Valuation, Production, and Financial Planning: A Stochastic Programming Approach
Xiaodong Xu and John R. Birge 641
Published online 7 August 2006

Vulnerable Options in Supply Chains: Effects of Supplier Competition
Volodymyr Babich 656
Published online 28 July 2006

Financial Engineering of the Integration of Global Supply Chain Networks and Social Networks with Risk Management
Jose M. Cruz, Anna Nagurney, and Tina Wakolbinger 674
Published online 1 August 2006

Hedging Quantity Risks with Standard Power Options in a Competitive Wholesale Electricity Market
Yumi Oum, Shmuel Oren, and Shijie Deng 697
Published online 28 July 2006

Stochastic Programming Models for Replication of Electricity Forward Contracts for Industry
Roy H. Kwon, J. Scott Rogers, and Sheena Yau 713
Published online 7 August 2006

Issue 8, December 2006

From the Editor: Technical Notes in NRL
Barry L. Nelson 727
